FOSS

IQX™

# **Take Control** of Supplier Quality Management

Empowering the food industry with a centralized solution that simplifies collaboration, compliance, and transparency with your suppliers.

## The Transformative Benefits of IQX

**Ease of Use**
Create new suppliers in the system and assign a status efficiently.

**Centralization**
One central place to organize your suppliers for approval and corrective actions.

**Material Lists**
Access information on a supplier easily to view approved materials.

## Key Features for Efficient Supplier Quality Management

**One Reliable Digital System to Maintain Consistent Data**
Decomplexify the process for onboarding new suppliers with automated reminders and step-by-step guides.

**Save Time Inputting Information and Creating Reports**
Ensure transparency across your organization and follow up on corrective actions with reminders and reports.

**Easily Evaluate Supplier History**
Utilize data aggregation to view an overview of documents, reports, and a history of supplier material quality.

## Trust. Quality. Insights.
